

§ 661.27 When is a bridge eligible for replacement?

To be eligible for replacement, the bridge must be considered deficient for reasons of structural deficiency or functional obsolescence. Also, the bridge must have a sufficiency rating of less than 50 to be eligible for replacement.

§ 661.29 When is a bridge eligible for rehabilitation?

To be eligible for rehabilitation, the bridge must be considered deficient for reasons of structural deficiency or functional obsolescence. Also, the bridge must have a sufficiency rating of less than or equal to 80 to be eligible for rehabilitation. A bridge would be eligible for replacement if the total life cycle cost for bridge rehabilitation exceeds the costs to replace.

§ 661.31 How does ownership impact project selection?

Since the Federal government has both a trust responsibility and owns the BIA bridges on Indian reservations, primary consideration would be given to funding construction projects for deficient BIA owned IRR bridges. We emphasize that consideration could also be given to the funding of construction projects for the deficient non-BIA, IRR bridges, however; these projects must be supported by a tribal resolution.

§ 661.33 Do IRRBP projects have to be on a transportation improvement program (TIP)?

Yes. All IRRBP projects have to be listed on an approved TIP. Under 23 U.S.C. 204(j), IRR bridges must appear on the BIA's IRRBP TIP and be forwarded to the State.

§ 661.35 What percent of the funding in any fiscal year is available for use on BIA owned IRR bridges and non-BIA owned IRR bridges?

Up to 80 percent (\$10.4 million) of funding in any fiscal year would be available for use on BIA owned IRR bridges. This would leave 20 percent (\$2.6 million) of funding in any fiscal year that would be available for use on non-BIA owned IRR bridges. A smaller percentage of available funds has been set aside for non-BIA IRR bridges,

since States and counties have access to Federal-aid and other funding to replace and rehabilitate their bridges and that 23 U.S.C. 204(c) requires that IRR funds be supplemental to and not in lieu of other funds apportioned to the State. The program policy will be to maximize the number of IRR bridges participating in the IRRBP in a given fiscal year regardless of ownership.

§ 661.37 What percent of a specific project's construction costs is covered under this program?

The following funding provisions apply in administration of the IRRBP:

(a) 100 percent IRRBP funding would be provided for a BIA owned IRR bridge;

(b) Up to 80 percent of the IRRBP funding would be provided for a State, county, or locally owned non-BIA IRR bridge;

(c) States, counties, local and tribal governments would be required to provide at least 20 percent of the funds for non-BIA owned IRR bridges;

(d) The IRRBP funding ceiling for any single non-BIA owned IRR bridge project would be \$1.5 million.

§ 661.39 When are IRR bridge projects eligible for funding?

The statute provides that IRR funds to carry out IRRBP projects shall be made available only on approval of the PS&E by the Secretary (FHWA). Approval consists of having completed and approved bridge design, specifications and estimates. The project must be ready for construction, right of way must have been acquired, and the project contract must be awarded within 120 calendar days of funding. A copy of the FHWA or BIADOT PS&E approval letter, certification checklist and IRRBP TIP must be forwarded by the area office to the BIADOT/FLH for review and acceptance. For non-BIA IRR bridges, the application package must also include a tribal resolution supporting the project. Submittal of an incomplete application package would form the basis for project disapproval and the BIA area office would have to revise and resubmit the package.
